

EduPlatform

EduPlatform's focus is student centered, enabling students to receive teacher created lessons which adapt to their individual learning styles and curriculum needs, while enabling teacher control of their PC's so they stay task focused.

"Lesson builder is revolutionary for organizing and delivering my digital lessons," claims Mrs Baker, of Nash Rocky Mount Early College H.S., NC. *"For my week-long Darwinian evolution project, I sent as one Digital Lesson – a PowerPoint on evolution, 6 internet sites, directions in a Word document and a rubric for a comprehensive obituary of Darwin that students design in Publisher!"*

Teachers can keep students engaged by easily integrating digital resources into the curriculum and by providing teacher access to the tools necessary to minimize distractions and maximize instructional time by:

- real time monitoring
- remotely launching and closing applications
- enabling/disabling access to the OS
- blocking and sharing screens
- polling/testing with immediate graphed results,
- and more.

Classroom Manager keeps George Bischoff's science students from distractions. *"During the first weeks of EduPlatform,"* he recalls, *"I used PrintScreen to get snapshots of a few students who used internet privileges to open web-based email. That off-task behavior ceased!"*

EduPlatform meets Grant, IDEA, Title 1 and Stimulus funding criteria and reporting requirements because you can easily track and record student improvement.

Contact perfect@gate.net for a Free 30-day trial of EduPlatform.

Cost to purchase (not a yearly fee):

EduPlatform for 20 unit Mobile Lab: \$895

EduPlatform for 30 unit Mobile Lab: \$1,200
